## Special ingredients:

- **PENTAVITIN®\***: Skin identical carbohydrate complex for long-lasting moisturising of the skin. 72 hour, long-lasting effect thanks to the permanent junction to the keratinocytes of the Stratum corneum. This strengthens the barrier function which reduces transepidermal water loss.
- **Allantoin**: The calming and anti-inflammatory properties counteract redness.
- **Shea Butter**: Moisturises the skin and makes it soft and supple.
- **Vitamin E acetate**: Is converted within the skin to free Vitamin E and has an anti-oxidative effect.
- **Alpha bisabolol**: The calming and anti-inflammatory properties counteract redness.
- **Short-chain hyaluronic acid**: Short-chain hyaluronic acid is able to penetrate the upper layers of the Stratum corneum and bind water there. This results in a higher water content in the skin and transepidermal water loss is reduced. The skin is padded from the inside out.
- **Long-chain hyaluronic acid**: Long-chain hyaluronic acid is not able to penetrate the skin, but it does form a water-binding film on the surface and thus protects the skin from drying. Fine lines and wrinkles are smoothed (line filler effect).
- **Edelweiss extract**: The alpine Edelweiss extract has a high anti-oxidative capacity and acts as a very good radical interceptor and protects the skin from damages caused by an excess of free radicals. In addition, the extract also has a calming effect. Further, Edelweiss also inhibits enzymes (e.g. hyaluronidases and 5-lipoxygenases which contribute towards skin ageing.)
- **Venuceane®**: Prevents IR-induced stress. It inhibits inflammation responses, improves the hydration of the Stratum corneum and maintains the structure of the skin thus limiting the formation of wrinkles.
- **Matrixyl synthe´6®**: Highly effective peptid encourages the synthesis of 6 key components of the skin matrix of the dermoepidermal junction zone. The skin is smoothed and lifted. Unpopular lines and wrinkles are also counteracted considerably. The average wrinkle depth is reduced after two months by approximately 15%. The wrinkle volume is reduced by about 20%.
- **Light- Diffusing Pigments**: Light-diffusing pigments ensure immediate brightening of the entire eye region. Wrinkles are immediately reduced optically. The eyes look radiant and fresh the entire day.
