## Special ingredients:

- **Long-chain hyaluronic acid:** Long-chain hyaluronic acid is not able to penetrate the skin, but it does form a water-binding film on the surface and thus protects the skin from drying. Fine lines and wrinkles are padded out (line filler effect).
- **Short-chain hyaluronic acid:** Short-chain hyaluronic acid is able to penetrate the upper layers of the Stratum corneum and bind water there. This results in a higher water content in the skin and transepidermal water loss is reduced. The skin is supplied with long-lasting moisture and padded from the inside out.
- **Instensyl®:** Three-dimensional biopolymer on a sugar basis, won from the root of the cassava plant. Thanks to the immediate and long-lasting bond with the surface of the skin, this ingredient results in a rapid firming of the skin which can still be felt even hours after application. Users confirm the perceptible effect.
- **Phytexcell Guarana®:** Guarana seeds have a very high caffeine content. Caffeine promotes blood circulation and has a revitalising and refreshing effect. Signs of skin fatigue are reduced.

## Use in the cabin/at home

Carefully break open the ampoule in a tissue and distribute the contents to the cleansed skin of face, neck and décolleté and gently massage in.

## Note/tip

Can be used as a one-off treatment or as week-long course of treatment.
