

Peel20 Exfoliator

Ref. 4172 / 4172P

Description	Peeling with 20% fruit acids
Retail size	30 ml dispenser
Professional size	50 ml dispenser
Skin type	For all intact skin types
Product galenics	Gel

Description

Peel20 Exfoliator with 20% fruit acids is the mildest fruit acid peeling in the SKIN RENEWAL & RESTORE SYSTEM. The pH-optimized acid mixture offers a particularly gentle introduction to the extraordinary peeling method for skin renewal.

The appropriately dosed fruit acids are integrated into a cooling gel and guarantee optimum skin tolerance. The maximum exposure time of 20 minutes depends on the skin type to be treated. If the skin appears rather thin and sensitive, a shorter exposure time is sufficient. A longer exposure time is possible in the case of thick and non-sensitive skin.

Purpose and function

- Mildest peeling treatment course
- With pH value of 4.2
- Retains the skin's own moisture to protect the natural hydrolipidic barrier
- For a clean and clear skin appearance and an even skin tone
- Refines the complexion

Main active substances

Mixture of nature identical fruit acids:

AHA: Glycolic, malic, citric and tartaric acid, gentle and reliable removal of surplus skin hornification (keratolytic effect), stimulation of cell proliferation

Home care application

Apply the gel onto cleansed skin **in the evening** 2 to 3 times a week over a period of approx. 4 weeks – leaving out the **eye contours and mucous membranes**. Allow the peeling to work in for 3 to max. 20 minutes and then wash off thoroughly with a moist mask sponge. Then apply the night cream.

Professional application

Pour Peel20 Exfoliator into a glass bowl and distribute generously over the face, neck and neckline using a brush. **Time required to work in: 3 to max. 20 minutes.** Remove completely with moist, pleasantly warm compresses.

Attention: Subsequent treatment with pH Neutralizer is important to stop the acid activity remaining in the skin.

Note

pH value 4.2

Apply only on intact skin.

Do not leave on the skin for more than 3-20 minutes.

Avoid contact with eyes or mucous membranes.

Wash off immediately in the event of skin intolerance.

Store out of the reach of children.

For external application only.

After treatment, it is vital to protect the skin with Premium Age Protector SPF 30.

Incis

aqua [water], butylene glycol, malic acid, sodium hydroxide, glycolic acid, sorbitol, citric acid, xanthan gum, tartaric acid, tetrasodium glutamate diacetate, CI 19 140 [yellow 5]
