DESCRIPTION

Innovative Exfoliating Pads for daily use, that refine the skin's texture and gently remove dead skin cells with a combination of glycolic, lactic and citric acid. With vegetal glycerine the skin is protect against external aggression like air pollution and cold. It improves skin's elasticity and firms the skin. In addition, the skin is supplied with moisture. Panthenol and Provitamin B5 soothe and nourish the skin.

The result is a radiant, youthful complexion.

Purpose and function

- Gently removes dead skin cells
- Refines skin's texture
- Protects against external aggression
- Improves skin's elasticity
- Moisturizes
- Soothes

Special ingredients:

Mix of fruit acids:

AHA acids: Consisting of glycolic acid (sugar cane), malic, citric, tartaric acid; they remove dead skin cells (keratolytic effect), increase the cell renewal rate and improve the skin structure. Old, superfluous dead skin cells are dissolved and removed while new cells are able to reach the surface of the skin..

Glycerine: Is hygroscopic and binds water in the upper layers of the Stratum corneum. This increases the moisture content of the skin and reduces transepidermal water loss.

D-Panthenol: Soothes the skin, improves its regeneration activity and leaves a velvety soft feel on the skin.

HOME CARE

After cleansing gently apply the pad on the facial skin. Then use your day care cream like Premium Age Protector SPF 30 or Premium Age Protector Ultra SPF 30.

NOTE

Apply only on intact skin.

Avoid contact with eyes and mucous membranes.

In the event of skin intolerance, remove immediately.
