Professional size	Ampoule 25 x 2 ml
Skin type	Especially for skin with barrier damages and for use alongside treatment for neurodermatitis
Product galenics	Liquid with oily phase and aqueous phase

DESCRIPTION

A two-phase ampoule with effective Pro Barrier concept to treat damage to the skin barrier and for use alongside treatment of neurodermatitis. Combats flaky skin and itchiness, increases overall well-being, smooths skin and combats wrinkles. The Repair Complex made from natural plant extracts (including blackcurrant seeds and balloon plant extract) regenerates the natural skin barrier. The production of filaggrin, which is essential for creating new skin, is boosted. This reduces transepidermal water loss and strengthens the skin barriers. Premium lipids and oils, such as macadamia nut oil and inca inchi oil, which is rich in omega-3 and unsaturated fatty acids, help clearly improve smoothness of the skin. The combination of panthenol and bisabolol soothes and combats redness. Hyaluronic acid helps smooth lines and wrinkles.

Effects and characteristics

- Two-phase ampoule
- Pro Barrier concept
- Repair Complex
- Regenerates and strengthens natural skin barrier
- Alongside treatment for neurodermatitis
- Combats flatty skin and itchiness
- Increases overall well-being
