## Sun Guard Spray SPF 50

Ref 4270  
size 150ml

### DESCRIPTION:

Lightweight sun protection spray with high SPF 50, the active cell protection Ectoin and the natural UV protection Karanja oil. Moisturizes, absorbs quickly, is non-greasy and water-repellent.

### SPECIAL BENEFITS:

- prevents hyperpigmentation
- for all particularly light-sensitive skin zones
- skin-friendly and photostable UV filter substances
- delays light-induced skin aging
- water repellent emulsion with protection against UV-B and UV-A radiation
- counteracts sunburn and moisture deficits

### ACTIVE INGREDIENTS:

- **UVA/B broadband filters**
- **Ectoin:** The natural active ingredient Ectoin® is obtained from microorganisms that live in extreme environments (e.g. in geysers, salt lakes or in the ice of the Arctic). The Ectoin® formed in the micro-organisms protects them from the extreme environmental factors prevailing there. Ectoin® is used in cosmetics because it has caring, anti-inflammatory and protective properties. Cells are stabilised by Ectoin® and thus protected against harmful environmental influences such as UVA and UVB radiation
- **Karanja oil:** Karanja oil, also called Pongamia oil, is extracted from the Karanja tree, the "Indian beech". It thrives mainly in the south of India. Due to its hydrating and soothing properties it counteracts premature skin aging. Karanja oil is also known for its ability to protect the skin from the sun. This is because it has UV ray absorbing properties and provides natural sun protection.
- **Vitamine E:** antioxidant effect.

### APPLICATION:

Half an hour before sun bathing spray deliberately onto your skin and distribute.
